PROFESSIONAL SUMMARY

Results-driven Web Developer and Website Manager with expertise in building, maintaining, and optimizing websites. Skilled in back-end and full-stack development, ensuring secure, scalable, and high-performing platforms. Experienced in API integrations, database management, and server deployment. Adept at collaborating with cross-functional teams to deliver seamless digital experiences and keep websites aligned with business goals.

KEY SKILLS

- **Web Development & Management:** React, Vue, Angular, JavaScript, Node.js, Express, Spring Boot
- **Back-End & API Development:** RESTful APIs, Authentication, Integrations (Flutterwave, Cloudinary, WhatsApp, Email)
- **Database Management:** MongoDB, SQL, Oracle
- **Infrastructure & Deployment:** Git, Docker, CI/CD, Server Monitoring, Uptime Management
- **Website Optimization:** Performance Tuning, Caching, Security (XSS, SQL Injection, PCI Compliance)
- **Soft Skills:** Project Management, Team Collaboration, Problem-Solving

---

PROFESSIONAL EXPERIENCE

Lead Backend Engineer / Website Manager
GRUP LIMITED | Feb 2025 – Present

- Managed the end-to-end architecture and backend infrastructure of a group buying platform.

- Oversaw website performance and uptime, implementing caching, query optimization, and monitoring tools to ensure 99.9%+ availability.
- Designed and maintained RESTful APIs, supporting web and mobile front-end integrations.
- Ensured robust security with JWT authentication, role-based access control, and PCI-compliant payment systems.
- Coordinated feature rollouts, bug fixes, and server deployments across development, staging, and production environments.
- Provided regular system reports and technical documentation for management and stakeholders.

Web Developer
Phlames Fashion Stores | Feb 2024 – Apr 2024

- Developed and maintained back-end systems with Java, Spring Boot, and Hibernate.
- Integrated secure RESTful APIs with the front-end, improving website responsiveness and user experience.
- Conducted unit testing and database optimization, reducing errors and improving load times.
- Collaborated with front-end developers to deliver seamless website updates and features.
- Integrated third-party APIs (payment gateways, social media) to extend site functionality.

Backend Development Intern
PIPELINE | Oct 2023 – Nov 2023

- Supported the development and maintenance of back-end applications with Spring Boot and Hibernate.
- Debugged and resolved application issues, reducing downtime by 10%.
- Assisted with database scripts and optimization to maintain performance.
- Contributed to front-end integrations, ensuring smooth website operation and user experience.

EDUCATION & CERTIFICATIONS

Bachelor of Science – Systems Engineering
University of Lagos, Akoka | *In Progress*
Relevant Courses: Python Programming, C++, ANSYS CFD

ACWD Pro Certification – Aptech Computer Training
Responsive Web Development & Integration

Full-Stack Development Certification – Power Learn Project
Software Development, Web Integration

PROJECT HIGHLIGHTS

E-Commerce Website Optimization

- Reduced website load times by 40%, increasing customer retention by 15%.
- Streamlined transaction processes by integrating caching and optimized API calls.

ADDITIONAL INFORMATION

- **Languages:** English (Fluent)
- **Hobbies:** Competitive programming, mentoring junior developers, exploring innovative technologies
